Living with ONE

WHAT IS HABITAP ONE HOME

Habitap ONE Home is a cloud-driven platform that brings intuitive smart technology to access management, making it truly seamless with minimal set-up and low cost of entry.

Living with ONE

RESIDENT ACCESS

You can manage QR credentials on one administration portal, including activating/deactivating access for residents, assigning administrative rights and more. All residents only need to install the Habitap One app.

VISITOR MANAGEMENT

With the Habitap One app, residents can invite guests ahead of time by sending a web-link invite to guests via mobile messaging tools like Whatsapp. Confirmed guests will receive a QR code to be used for tapping on the access control point at your property.

VISITOR WEB INTERCOM

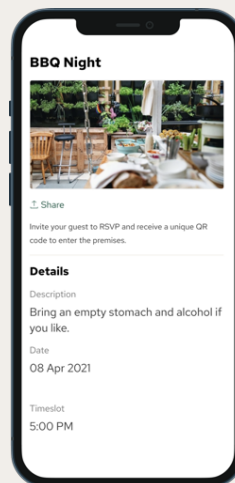

For unregistered visitors and delivery personnel, Habitap One offers an app-based web intercom system whereby they can buzz the intended resident upon arrival at the property. The resident would receive the call on the mobile so they may verify the visitor's identity and remotely unlock the door for entry.

INSTANT PASS

Residents may grant their unregistered guests quick access upon their arrival, instead of requesting for their details. All the host has to do is press the "Instant Pass" button on the mobile phone to send an in-app QR code (valid for one minute) to the visitor.

Features

Key Benefits

ONE is all you need

01**Shift CapEx into OpEx — savings to last 100 years**

Do away with high acquisition costs and adopt a flexible pay-per-use subscription.

02**Manage and control everything online**

Drive a dynamic and mobile workflow with a centralised web-based platform you can access anywhere at any time.

03**Eliminate physical access cards and go contactless**

Reduce the need for interaction and provide a touch-free and safe entry for residents and visitors.

04**Protect data with daily cloud back-ups**

Rest easy knowing that data is safe and recoverable readily with cloud back-up storage.

05**Reduce carbon footprint**

Choose cloud-based technology over traditional hardware and software for a long-term and more sustainable solution.

6 Habitap QR Reader and Wireless Controller

QR CODE SPECIFICATIONS

- Utilises high-performance CPU and operating on Linux system
- 2-inch high-definition IPS screen, resolution 480*360
- Built-in speaker and audio messages library
- Wired Ethernet or WIFI (optional) networking mode, TCP/IP communication;
- Support https;
- Built-in one relay output, one 485 output, one anti-dismantling alarm output
- Built-in one exit button input and one door sensor input
- The device can be configured for online verification or offline verification.
- The Habitap QR Reader can whitelist 100,000 pieces of personnel information and 100,000 pieces of access data records.

Communication Method	Ethernet/WIFI/485
WIFI protocol	802.11b/g/n
operating system	Linux operating system
processor	Cortex™-A7 1.2GHZ
Storage memory	512M
Ethernet interface	2.0 terminal
Protocol	http, https
Server communication	TCP/IP
Input	Two inputs
Output	One anti-dismanting alarm sensor output One 485 output One relay output
Reading angle	Rotation angle 360° Elevation angle $\pm 55^\circ$ Deflection angle $\pm 55^\circ$
Scanning angle	72° (horizontal) 54° (vertical) 84° (diagonal)
Reading speed	<200 ms
Operating temperature	-20°C to 60°C
Operating power	Rated power: 3W Peak power: 5W
Storage capacity	100,000 offline users 100,000 offline records
Display	IPS 2-inch display Resolution 480*360
Relay class	2A current
Recognition distance	QR code: 5 to 30CM
Input power	DC 12V 2A
Dimensions	115mm * 75mm * 15mm
